Appears in Collections: [Ohio State Engineer: Volume 3, no. 1 \(November, 1919\)](#)

Automatic Reclosing Circuit Breakers

Know when to Reclose as well
as when to Open

Opens Automatically

When an overload occurs.
When a short circuit occurs.
When voltage fails.

Recloses Automatically

At the expiration of a definite time interval—providing the resistance of THE CONNECTED LOAD is at or above a certain minimum value and the line voltage normal.

Refuses to Close

When the resistance of THE CONNECTED LOAD is below a certain minimum value or a short circuit exists, or line voltage is abnormally low.

Bulletin No. 302 gives Complete Details

Engineers of the Scarlet and Grey

The Ohio State Engineer is full to the brim of matters of vital interest to every alumnus of "State."

If you are interested in higher salaries, watch the progress of forces tending to raise them, thru your college paper.

Don't you wonder where your old "side-kick" is working, and what he is doing? Don't you enjoy seeing the announcement that he has at last succumbed to the girl you used to chase around?

All right! Then subscribe for the
